

SARS-CoV-2

IVD Controls & RUO Materials for
Routine Testing & Assay Development

COVID-19 Testing

Routine
Quality Control

Assay
Development

- **HE0060S** SARS-CoV-2 Synthetic RNA (N1, N2 & N3 Gene Targets)
- **HE0058N** Negative Cellularity Control (Inactivated Pellet)
- **HE0061S** SARS-CoV-2 Synthetic RNA (N/E/RdRp/S Gene Targets)
- **HE0062S** SARS-CoV-2 Process Control (Pellet) [COMING SOON]
- **HE0063S** SARS-CoV-2 Process Control (Swab) [COMING SOON]
- **R9000** RUO SARS-CoV-2 Process Control (Pellet)
- **R9001** RUO SARS-CoV-2 Process Control (Swab)
- **9009** SARS-CoV-2 Synthetic RNA (N Gene Targets)
- **9019VP** SARS-CoV-2 Synthetic RNA (E/RdRp Gene Targets)
- **9029VP** SARS-CoV-2 Synthetic RNA (S Gene Targets)
- **R9000** RUO SARS-CoV-2 Process Control (Pellet)
- **R9001** RUO SARS-CoV-2 Process Control (Swab)

Quality Control Simplified

From assay development to routine quality control, SARS-CoV-2 research materials and IVD controls from Microbiologics combine precision with the convenience of user-friendly formats. The Microbiologics Virology Team (formerly Virapur) has been working with our customers since the outbreak of COVID-19 to develop solutions for the challenges of this new coronavirus. As a pioneer in high titer virus production, our Virology Services Team is a trusted partner in virus research. Labs around the world depend on the Helix Elite™ line of IVD molecular standards for simplicity and reliability.

Additional Information

Contact your Microbiologics representative to learn which controls are right for your COVID-19 testing quality control or assay development.

SARS-CoV-2 CONTROLS

We Create Confidence in Science with Precision Controls & Expert Support

Microbiologics brings together standard-setting controls and expert technical support to help our customers achieve accurate results, test after test.

SARS-CoV-2 IVD Controls for COVID-19 Testing

- **HE0060S** SARS-CoV-2 Synthetic RNA (N1,N2 & N3 Gene Targets)
- **HE0061S** SARS-CoV-2 Synthetic RNA (N/E/RdRp/S Gene Targets)

SARS-CoV-2 Process Controls for COVID-19 Testing

- **HE0062S** SARS-CoV-2 Process Control (Pellet)* [COMING SOON]
- **HE0063S** SARS-CoV-2 Process Control (Swab)* [COMING SOON]
- **R9000** RUO SARS-CoV-2 Process Control (Pellet)
- **R9001** RUO SARS-CoV-2 Process Control (Swab)

Negative Control Containing A549 Lung Epithelial Cells

- **HE0058N** Negative Cellularity Control (Inactivated Pellet)

SARS-CoV-2 RUO Synthetic RNA

- **9009** SARS-CoV-2 Synthetic RNA (N Gene Targets, 1 x 10⁹ genome copies per tube)
- **9019VP** SARS-CoV-2 Synthetic RNA (E/RdRp Gene Targets, 1 x 10⁹ genome copies per tube)
- **9029VP** SARS-CoV-2 Synthetic RNA (S Gene Targets, 1 x 10⁹ genome copies per tube)
