

EASY, ACCURATE RESULTS

LEUKO EZ VUE®

Only rapid test to detect intestinal inflammation from enteric infection

- Detects elevated levels of fecal lactoferrin, a marker of fecal leukocytes and an indicator of intestinal inflammation
- Simpler and more accurate than microscopy for fecal leukocytes
- Rapid results in 10 minutes

LEUKO EZ VUE®

Product Order Information

Product Name	Cat. No.	Sample Type	Time to Result	Format
LEUKO EZ VUE®	T30355	Fresh, frozen, refrigerated or room temperature	10 minutes	Lateral flow qualitative

The LEUKO EZ VUE® test is simpler and more accurate

LEUKO EZ VUE®

Microscopy

- Standardized and reproducible results in 10 minutes
- Clear results are unaffected by cell breakdown
- Samples can be stored up to 2 weeks refrigerated or at room temperature without loss of sensitivity
- Can be batched or run individually for on-demand testing
- Subjective interpretation can vary by technician
- Must be run immediately to minimize cellular breakdown
- Tedious to perform and time consuming
- Significant technical training needed

Assay Protocol

1 Add 2.5mL *Diluent* to a tube

2 Fill flared tip with sample and add to tube containing *Diluent*.

3 Add filter tip to tube. Vortex to mix.

4 Add 5 drops to *Sample Well*. Read at 10 minutes.
